

July 7, 2021

To the South Windsor Parks and Recreation Day Camp families,

I am writing to inform you all that as in past summers, SWPRD is happy to partner with Quinnipiac School of Nursing to provide undergraduate clinical experiences for the Summer 2021 semester! This partnership was initiated through one of our Camp Nurses, Teresa Twomey, who is also a professor at Quinnipiac University. This affiliation will supplement camper care and benefit and enrich our program through the stimulus of association with the University while also developing professional competence in nursing students through clinical practice. Quinnipiac University will provide orientation, direct supervision, instructors, confidentiality and insurance. Students will be leading a variety of activities concentrating on health and healthy habits.

All visiting students and instructors have met all the health and immunization requirements, including being fully vaccinated for COVID – 19. In addition, each student has completed a Criminal Background Check, a 14-panel drug screen, has current CPR certification, and has taken and passed the CHA Student Health & Safety Training Test.

We look forward to 8-10 of QU's Nursing students being part of our daily activities on July 8, 15, 16, 22, 23, 29, 30 and August 6. (If needed, a make-up day may be scheduled).

Thank you for joining us in helping support nursing students and the growth of the profession!

Thank you,

*Paul Macchi*
